

Minds & Models

Building the first recommender system for physical stores.

— TRUSTED BY —

Retail lost its **personal touch**.
We shop in person, but we've never
felt more **disconnected**.

Lack of Offline Data

*87% **analytics** in-store are collected after payment.*

Lack of Measurability

*70% **of marketers** struggle to target & measure offline ads.*

Smaller Basket Sizes

*71% **of customers** expect personalized interactions.*

Privacy first Intelligence

 Age: 25-35

 Gender: Male

 Build: Athletic/Muscular

 Style: Athleisure/Gym wear

 Brand: Under Armour

 Bag: Gym Bag/Duffel

 Tech: Smartphone

 Wristwatch

-  Sense the Visual Context of the Customer
-  Derive Individual Customer Behavior Patterns
-  Recommend the Best Product for Customer
-  Learn from Consumer Intelligence Collected

Deliver Your Messaging on **Personal Level**

Step 1: Picks the Right Product

Automatically pick the most relevant product based on the visual attributes.

Step 2: Generates the Right Text

Generates custom personalized ad text in real-time based on:

- Tone of Voice
- Product Info
- Visuals

3 Phases of Business Model

Consumer Intelligence
Companies & Data Brokers

Custom pricing

Phase 3: **Retail Intelligence Infra** (future)

Scaling the technology into a new category of physical retail data infrastructure to provide industry-wide behavioral insights.

Brands & Retailers

Service-based

Phase 2: **Store Intelligence**

Shift the focus from content delivery to store intelligence by detecting physical shopper behavior data.

Retailers & DOOH
Operators

Solution as a Service
(SaaS & HaaS)

\$150/device/month

Phase 1: **Physical Recommender** (today)

Initial market entry point. Delivers context-aware messaging to in-store screens to improve retail media performance.
