INSIGHT FOR THE STORE

Segments are recognised by **visual cues at the entrance** — and differ by an order of magnitude in basket: students are the most numerous (low basket), but **Dad 40+** has a €90 basket (+74%). Volume vs. value — whom to grow by volume and whom by margin.

## 04 · WHO HEADS TO WHICH CATEGORY

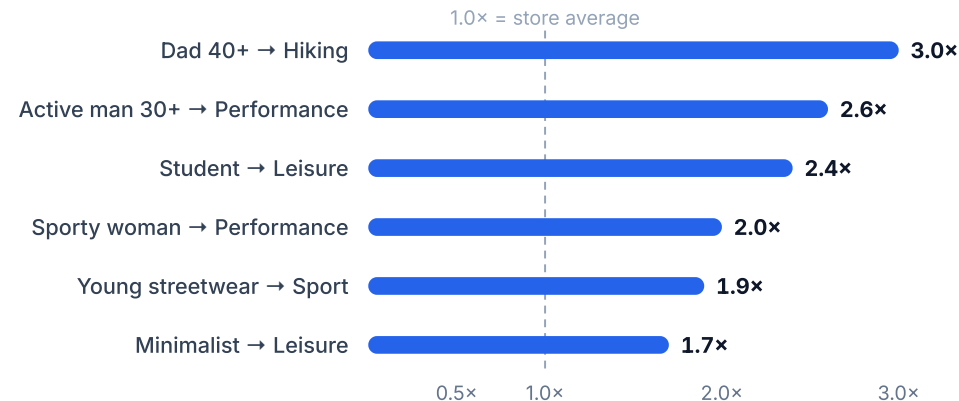

# The persona at the entrance reveals the category they'll head to

## Revenue share by category

Illustrative revenue split across the main product categories.

## Persona affinity to category — vs store average

### INSIGHT

The visual persona at the entrance **predicts the category** the customer will head to — before they even reach the shelf. An entry point for targeted screen content and assortment planning.

### IMPACT FOR THE STORE

Categories and navigation only work when you know **who heads where**. The data measures it in live operation — a basis for layout, in-store content and assortment management.

# From products to experience – sets drive the basket

|                                     |     |
|-------------------------------------|-----|
| Football boots × ball × shin guards | 41% |
| Running shoes × functional apparel  | 38% |
| Hiking boots × backpack             | 33% |

INSIGHT FOR THE STORE

The basket for a set is **2.3× higher**. Building sets for the segments that buy them (families, Dad 40+) is the fastest path to a higher basket.

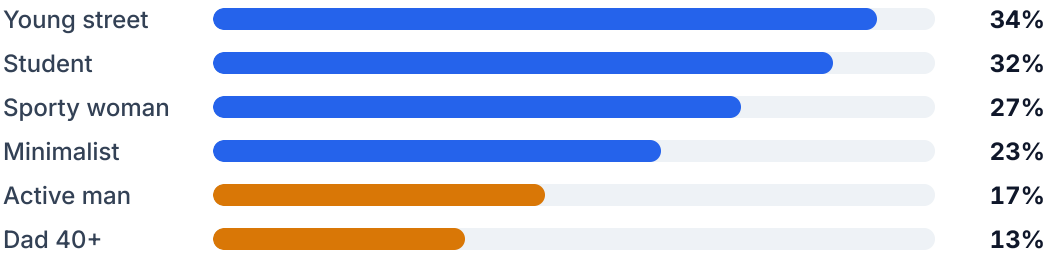

# High-value customers buy supplier brands — and skip the exclusive ones

Top brands by revenue (illustrative)

Orange = exclusive / own brands (higher margin). Shares are an illustrative model.

Share of exclusive brands in basket by persona

The highest-value segments (Active man, Dad 40+ — orange) have the lowest share of exclusive brands.

## INSIGHT

The biggest baskets (Dad 40+, Active man) go to **premium supplier brands** (Salomon, Nike) and skip the higher-margin exclusive brands.

## TASK FOR BUYING

Shift high-value segments into **exclusive brands** (ALPINE PRO / KILPI / LOAP) → higher margin from the biggest baskets.

THIS WAS JUST A TASTE

# How much do you still **not know** about the customers in your stores?

This pilot is just an excerpt. We'll gladly show you a deep-dive analysis tailored to your assortment — who heads to which category, which sets drive the basket, targeted screen content and data for rollout.
