

The same LEGO screen just showed a collector and a 7-year-old **the exact same ad.**

Your displays play a beautiful loop, yet they don't know who's watching. We give every LCD Media screen the power to **recognize the shopper and show them the right LEGO**, in real time. The result: more of the right set in more of the right baskets.

WHAT LEGO GETS: **THREE REASONS THIS PAYS FOR ITSELF**

1.6s

REACTION

Real-time personalization

Each shopper sees the LEGO set they're **most likely to buy**. Signage that sells, not just loops.

450+

ATTRIBUTES

Deep consumer intelligence

See exactly **who** engages your displays. E-commerce-grade analytics, at the physical shelf.

✓

GDPR & EU AI Act compliant

No faces, no identities stored. **Full personalization, zero privacy risk** for LEGO.

ONE SCREEN. **THREE SHOPPERS. THREE DIFFERENT STORIES.**

The Collector
ADULT · ALONE · AFOL

THE SCREEN SHOWS →
\$300 UCS Star Wars & Icons collector sets. The high-ticket hero he'd never see on a generic loop.

Higher basket value

The Parent
FAMILY GROUP · WITH CHILD

THE SCREEN SHOWS →
NINJAGO & City play themes, the sets that turn a child's pull into a "yes" at the shelf.

Higher conversion

The Tourist
ON THE MOVE · SHOPPING BAGS

THE SCREEN SHOWS →
Exclusive, easy-to-carry gift sets. Impulse-perfect and suitcase-friendly.

Incremental impulse sales

Let's light up **one flagship store**.
A localized pilot on existing screens, measured from day one.

Next step: scope a single-store pilot
